APPLIED MATHEMATICS AND COMPUTATION

VOLUME 57

J. L. Freire Nistal, F. Alonso Amo, and F. Aguado Martín
On the Naturality of the Iteration and Recursive Specifications 1

Yukio-Pegio Gunji
Forms of Life: Unprogrammability Constitutes the Outside of a System and its Autonomy 19

S. K. Chatterjea and H. M. Srivastava
A Unified Presentation of Certain Operational Formulas for the Jacobi and Related Polynomials 77

J. Abdalkhani
Higher Order Methods for Solving Volterra Integrodifferential Equations of the First Kind 97

Michael A. Golberg
The Discrete Sloan Iterate for the Generalized Airfoil Equation 103

Michael A. Golberg and Michael McKenna
The Numerical Evaluation of a Class of Logarithmically Singular Integral Transforms 117

Arun K. Mitra and Jutin Ortiz
A Massive Parallel Computation in Boolean Logic 131

R. Steven Gross
Computationally Efficient Method for the Solution of a Singular Integro-Differential Equation 161

A. J. Meir
Finite Element Analysis of Magnetohydrodynamic Pipe Flow 177

R. M. Jenkins and D. A. Moore
An Inverse Calculation Technique for Quasi-Three-Dimensional Turbomachinery Cascades 197

DANIEL Y. HWANG AND WINFRED A. FOSTER, JR.
On Axisymmetric Vibration of Shallow Spherical Shells with Fixed Circular Cutout 205

DAVID A. CICCI AND ROGER L. HALL
Optimal Weighting of A Priori Statistics in Linear Estimation Theory 221

DAVID A. CICCI
Sensitivity of Ridge-Type Estimation Methods to Observation Accuracy and Sampling Rate 233

A. CIUCCI, RHONALD M. JENKINS, AND WINFRED A. FOSTER, JR.
Numerical Analysis of an Unsteady Confined Supersonic Jet 245

ADEDEJI B. BADIRU
A New Computational Search Technique for AI Based on the Cantor Set 255

LJ. PETKOVIĆ AND M. PETKOVIĆ
Generalized Ostrowski Root-Finding Method 275

IBRAHIM A. AHMAD
Nonparametric Estimation of the CDF of Weapon Effectiveness on Target Performance 289

ALLAN J. MACLEOD
An Note on the Randles-Sevcik Function from Electrochemistry 305
